EDUCATION

Indian Institute of Information Technology Ranchi

Bachelor of Technology in Computer Science and Engineering

2024 – 2028

CGPA: 8.44 / 10.0

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, C, HTML5, CSS3, SQL

Frontend Technologies: Next.js, React.js, Tailwind CSS, Redux Toolkit, RESTful APIs, Axios

Backend Technologies: Node.js, Express.js, Socket.IO, JWT Authentication, Microservices

Cloud & Databases: MongoDB, MySQL, Render, Netlify, Vercel

Developer Tools: Git, GitHub, VS Code, Postman, GitHub Actions, Vite

Core Computer Science: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks

Methodologies & Concepts: Agile/Scrum, CI/CD, Test-Driven Development (TDD), Web Performance Optimization

EXPERIENCE

InAmbigos Foundation

May 2026 – Jun 2026

Web Development Intern

Remote

- Refactored legacy frontend code using **React.js** and **Tailwind CSS**, converting **5+** monolithic views into **20+** reusable software modules.
- Designed mobile-first interface layouts across **12+** product screens, driving a **35%** increase in user engagement and eliminating layout rendering defects.
- Executed frontend development within a **4-engineer** team, translating Figma wireframes into clean production code across **2-week** Agile sprints.
- Streamlined JavaScript bundle compilation and code-splitting, reducing page load latency by **28%** and securing a **95+** Google Lighthouse score on **15+** pages.

PERSONAL PROJECTS

PulsePlay – Full-Stack Video Streaming Web Application

Apr 2026 – May 2026

Tools: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs

- Built a video streaming service utilizing the **MERN stack** (MongoDB, Express.js, React.js, Node.js) capable of serving **250+** concurrent users at **360+** requests/sec throughput with sub-**200ms** response times.
- Authored **18+** RESTful API endpoints in **Node.js** and **Express.js** with **JWT authentication** for user access control and video metadata persistence.
- Crafted **25+** accessible frontend components using **Tailwind CSS**, maintaining complete compatibility across desktop, tablet, and mobile breakpoints.
- Established automated CI/CD workflows with **GitHub Actions**, **Render**, and **Netlify**, cutting release cycle duration by **50%**.

Talkify – Real-Time Room-Based Chat Web Application

Mar 2026

Tools: Node.js, Express.js, Socket.IO, MongoDB, EJS, CSS3

- Engineered a real-time chat application using **Node.js** and **Socket.IO**, supporting **500+** concurrent WebSocket connections per room.
- Programmed private room messaging with **on-demand** channel creation and passcode encryption across **25+** active channels.
- Pioneered client-side canvas image compression, reducing media upload file sizes by **40%** and accelerating transfer speeds by **2.5x**.
- Streamlined Socket event listeners and DOM rendering cycles, cutting real-time message delivery latency by **35%**.

ACHIEVEMENTS & HONORS

- CodeChef Competitions:** Earned a **3-star rating** (peak rating: **1609**) and attained **Global Rank 112** among **25,000+** competitors in CodeChef Starters 226.
- Data Structures & Algorithms:** Solved **650+** algorithmic problems across LeetCode, GeeksforGeeks, and CodeChef; participated in **40+** contests with an **85%+** accuracy rate.
- Inter-College Hackathons:** Delivered **4** web application prototypes during **24-hour** hackathons, completing **100%** of core MVP specifications.
